Mission - Accelerate the development and adoption of innovative solutions for better health and wellbeing.

## Priority Themes

- Digital Health and AI
- Value Based Healthcare
- Precision Medicine and Diagnostics
- Advanced Therapies
- Healthy Ageing
- Cancer

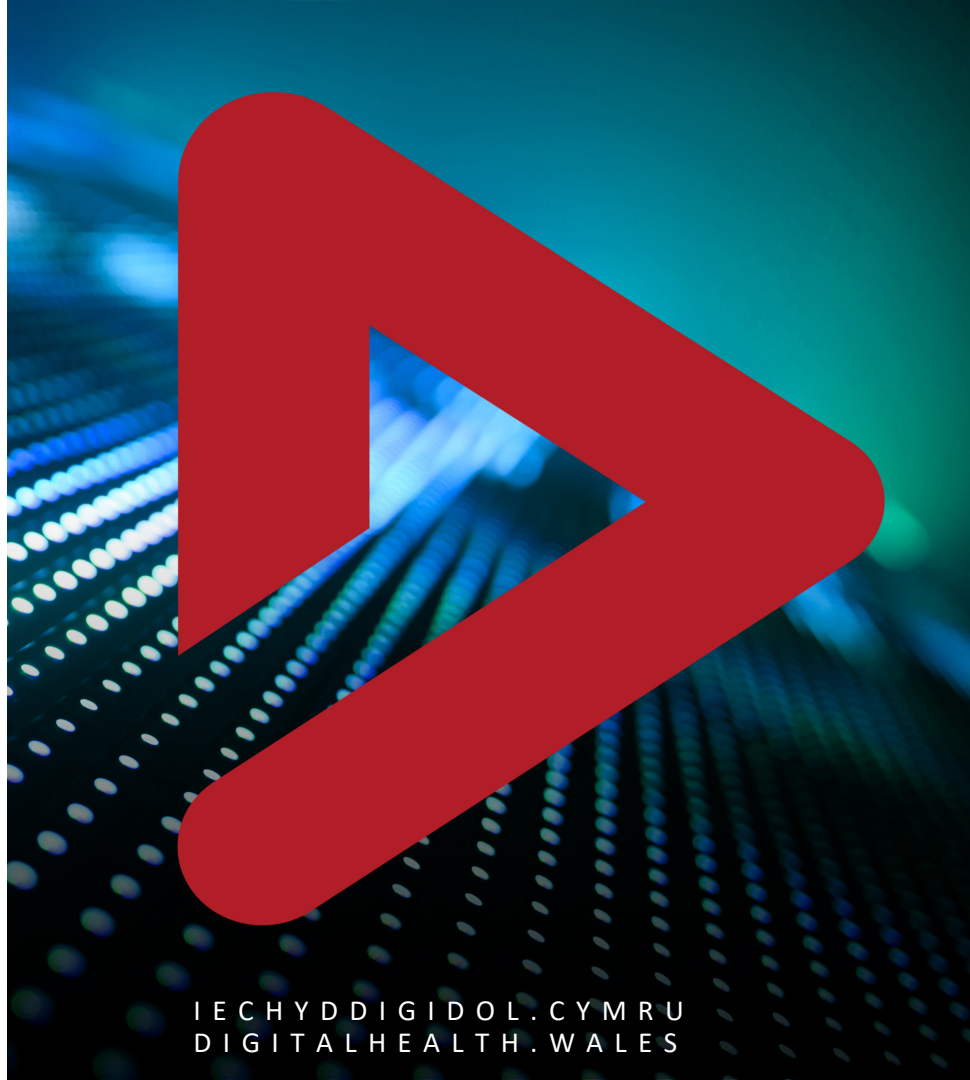

Digital Health Ecosystem Wales convenes and connects industry, academia, NHS and social care in Wales. It brings the sector together to discuss hot topics, issues and challenges in digital healthcare.

DHEW aims to make it easier and faster to adopt digital health technologies and is working to open NHS Wales systems and data to developers through a platform of APIs.

DHEW is a collaboration between the Life Sciences Hub Wales and the NHS Wales Informatics Service (NWIS) and is funded by the Welsh Government.

IECHYDDIGIDOL.CYMRU  
DIGITALHEALTH.WALES

- European £24m funded programme – co-funded by European Regional Development Fund (ERDF), Welsh Government, Life Sciences Hub Wales, universities, and health boards
- Aims to ‘accelerate’ innovation within the health care sector through research and development
- Multi-partner programme between LSHW and welsh Universities,
- Remit is to support companies to meet needs in Life Science and health care sector in Wales

Diolch yn fawr. Thank you
