Creating hotspot in life science in Japan

Shonan Health Innovation Park (iPark)
Takeda Pharmaceuticals

2019 9 Medicon Village Sweden

Talents and technologies are centering on “hotspots”

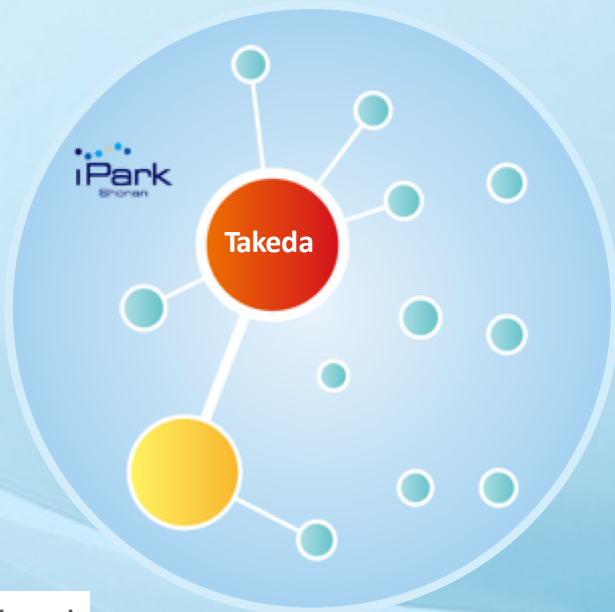

Life Science Global Startup Ecosystem Ranking, 2019

Startup Genome

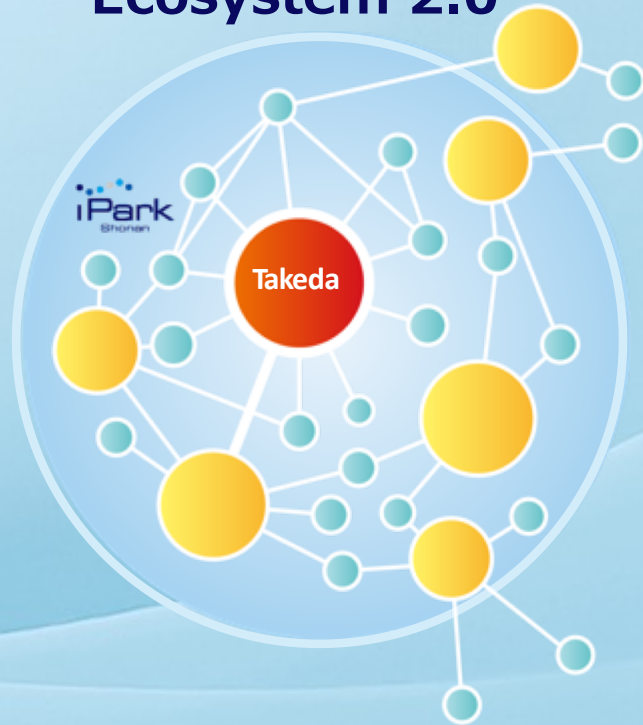

Aiming to Build an Innovation Ecosystem Open to the World

A place where a diverse range of researchers from many anchor tenants, aside from Takeda, gather from around the world and interact with one another

Ecosystem 1.0

Ecosystem 2.0

● Anchor ● tenant

iPark is one of the biggest wet Labs in Japan

Outline

Location Fujisawa City, Kanagawa Pref.

Completed February 2011

Area Land : 220,000m²
Building : 310,000m²

Laboratories A : Animal testing
(40 suites, 33,118m²)

B : Biochemical
(40 suites, 38,102m²)

C : Chemical synthesis
(36 suite, 35,226m²)

History

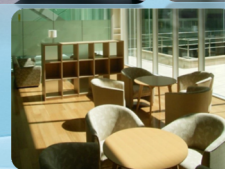

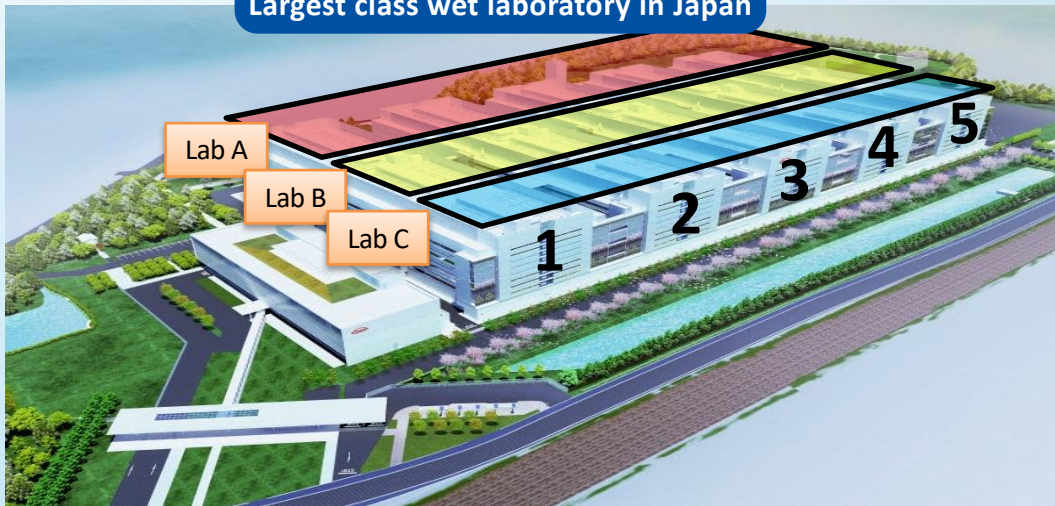

February 2011

Founded as the Shonan Research Center of
Takeda Pharmaceutical Company Limited

April 2018

Opened as Shonan Health Innovation Park
(iPark)

Largest class wet laboratory in Japan

Attractions

56 Companies with Diverse Technologies -from Academia to Startups to Large Companies-have Arrived and are Operating

Pharmaceutical company	   
Drug discovery	          
Drug discovery support
